Echo Control	101480
Tremolo Control	043281
Hardware Package	141268

#### INSTALLATION

CAUTION: DISCONNECT ORGAN POWER BEFORE PROCEEDING!

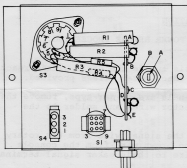

1. Mount the console connector chassis inside the organ within reach of the organ amplifier. Use the sheet metal screws provided.

NOTE: If the organ circuit terminals are solder-type, remove the spade lugs from the console connector wires and solder to the proper terminals.

2. Rotary (Leslie) Speaker: Remove the signal wire from the rotary channel speaker and connect to the brown wire from the console connector. Connect the violet wire to the speaker signal terminal.
3. Stationary (main) Speaker: Intercept the signal wire between the amplifier and crossover and attach the red wire from the console connector to the signal wire coming from the amplifier. Attach the green wire to the signal wire going to the crossover.
4. Pedal Speaker: In cases where the pedal signal is separate, disconnect the signal wire from the speaker terminal and attach it to the yellow wire coming from the console connector; attach the white wire to the speaker signal terminal. Attach the black wire from the console connector to the ground terminal of the speaker. (Note: If there is no separate pedal signal, tape the ends of the yellow and white wires to avoid shorting.)
5. Select a location along the keyboard where the Echo and Tremolo

6. Route the control cables through the keyboard shelf and into the area where the console connector is located. If no hole is provided in the keyboard shelf, drill a 1-inch diameter hole, being careful to select a location where no internal components will be damaged.
7. Connect the plug from the Echo switch to the ECHO SW socket on the console connector and the plug from the Tremolo switch to the TREMOLO SW socket.
8. Connect the 9-conductor cable to the LESLIE SPEAKER socket on the console connector. Replace the organ back, making sure that the cables are not pinched, and fasten securely. Attach the other end of the 9-conductor cable to the Leslie Speaker.
